A half-century has passed since Earth began moving its burgeoning population into gigantic orbiting space colonies... A new home for mankind; where people are born and raised...and die.

It is the year 0079 of the Universal Century. The cluster of colonies furthest from the Earth, Side Three, has proclaimed itself the Principality of Zeon and has launched a war of independence against the Earth Federation...

Initial fighting lasted over one month and half of the human population was lost. People were horrified by the indescribable atrocities that had been committed in the name of independence...

Eight months have passed since the rebellion began, and both forces are now at a stalemate. With half of Earth's population dead, both the Federation and Zeon had lost most of their military forces and now, innocent youths are left to fight the war.

## What are mobile suits?

Due to the discovery of Minovsky Particles which block radio waves and render electronically guided weapons useless, the age of long range warfare has ended and now close range visual contact warfare prevails. The humanoid weapons developed for close range warfare are called "mobile suits." The Earth Federation has lagged behind in this technological environment, but finally have mobile suits to counter the Principality of Zeon's Zaku.

## Federation VS. Zeon Combat!

Destroying enemy MS will decrease the enemy's Battle Gauge proportional to that MS's value.

If your Battle Gauge drops to 0, you lose!
